

Self Introduction

Good Morning Sir,

I am Prabakaran from Orleanpet. I completed my B-Tech in Christ Colleg of Eng & Tech. I am Working as a Software Developer in Twilight IT solution from 2019- Present. I had 3 years of expetience. I handled different types of projects. Like Genie MD, kewye, Gym Management and Book my Service.

Project Explanation:

1. kewye:

Project For : Online Real Estate Project

Module : User Module

Menus : Owned Property, Listed Property and Interested Property.

Roles : Fetch the Api according to the condition, in the single page.

Problem Faced: While Fetching the api, backend issue and some condition issue I faced.

Then I learned from Stack overflow and from my senior Developer. I solved that issue.

2. Genie MD:

Project For : Online Health Care Management

Module : Chronic Care System

Menus : Dropdown button, symtom button.

Roles : Fetch the Api according to the condition, in the single page, Bug Fixing,

Problem Faced: While Fetching the api, For Dropdown condition is not working properly.

At that time I learned about dropdown fetch with map method and apply condition. I soved the issue

3. Gym Management:

Project For : Online Gym Booking

Module : Staff Performance and Management

Roles : Collecting the datas of Staff and view in the form of Chart,

Problem Faced: I learned about rechart.js library to solve that issue.

4. Book Any Service:

Project For : Online Booking Service

Roles : Bug Fixing and solve some responsibility issues,
